

TRACKER

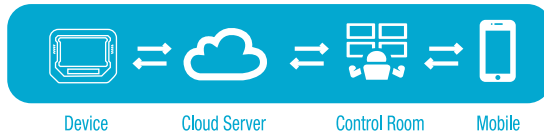

TRACKER

- ▶ Real Time Location Monitoring
- ▶ Geofencing

The Geofencing feature is the ability to define fields by entering coordinates from the map or by specifying dots on the map. This feature has the ability to name the fields on the map and make specific definitions according to various algorithms.

- ▷ Preferred areas
- ▷ No-go Areas
- ▷ Waypoints
- ▷ Customized Boundary Identification

- ▶ Over-Speed Warning
